## Approved Materials

### **: DESCRIPTION**

Gravity sewer pipe, SDR-26 PVC, conforming to ASTM D-1784, ASTM D-3034, ASTM D-2412, and ASTM D-3212. Pipe Shall be color coded green and clearly marked in 5 foot intervals (or less) with manufacturer's name, nominal size, cell classification, and legend. Maximum depth of gravity sewer using SDR -26 PVC, shall be less than 13 feet.

Where the depth of a gravity sewer is 13 feet or greater the pipe and fittings shall be DR-18 PVC. The pipe shall be installed with a locate warning tape placed one foot above the pipe and marked with the words "Gravity Sewer" continuously on the warning tape.

Specifications for the DR-18 PVC pipe see pages S-2 of the GCS Approved Materials Manual. Specifications for the DR-18 PVC sewer fittings see pages S-24 of the GCS Approved Materials Manual.

*Note: All valves shall open by turning to the left. Mechanical Joint shown as an example only. See specifications for additional joints.*

### **DESCRIPTION:**

All gate valves including tapping valves, regardless of size shall be AWWA C-515 D.I.

*Note: Any manufacturer who wishes to pour Ductile Iron into the mold of a C-509 type valve, creating a full wall D.I. valve, will be permitted to do so.*

All gate valves shall be equipped with the following items: all bolts, nuts, and washers shall be stainless steel 304 or 316 grade, assembled with anti-seize compounds; the wedge shall be ductile iron; all resilient wedge material shall be EPDM rubber with the wedge fully encapsulated in a manner to prevent the rubber from separating from the metal wedge; the entire gate valve shall be fusion-bonded epoxy coated conforming to AWWA C550 and NSF 61 certified; all stems shall be stainless steel, lead free, type 304 through 430 S.S. per ASTM A276; valve shall have a 2" operating nut and open left. All gate valves 10" and larger in size shall have four bolthole slots in the upper quadrant of M.J. Flange, or supplier shall supply equivalent hardware, including eyebolts and properly shaped restraining bolts, to accomplish the same installation, as part of the gate valve cost.

## **City of Green Cove Springs**

Approved Material

### **DESCRIPTION**

Fusible Polyvinylchloride Pipe (PVC) for force main distribution 4" thru 24". Fusible PVC pipe shall conform to AWWA C900, AWWA C905, ASTM D2241 or ASTM D1785 for standard dimensions, as applicable. Testing shall be in accordance with referenced AWWA standards of all pipe types. Fusible PVC pipe shall be extruded with plain ends. The ends shall be square to the pipe and free of bevel or chamfer. There shall be no bell or gasket of any kind incorporated into the pipe. Fusible PVC pipe shall be manufactured in standard 40' nominal lengths, or customs lengths as specified. Fusible PVC shall be green in color for high pressure sewer use.

#### **Manufacturer**

Underground Solutions Inc.

Item- Fusible Polyvinylchloride Pipe

# City of Green Cove Springs

## Approved Materials

### **DESCRIPTION:**

Extruded sheets or panels with integral male/female sliding lock connection ends. Material shall be HDPE with a minimum thickness of 60 mil, and shall be ribbed. Root barrier shall extend to a minimum depth of 42" below finish grade. The root barrier shall be a minimum of 12' long, centered on the tree and parallel to the utility main or service line being protected, unless shown otherwise on the plans. Root barrier shall be installed at any tree planted in a GCS utility easement, or any tree planted within 7.5' of all GCS utility mains or services. No trees shall be planted in a GCS utility easement without the approval of GCS. No trees shall be closer than 5' to any GCS utility line or services.

## Approved Materials

### **DESCRIPTION:**

Tracer wire for Horizontal Directional Drilling Installation shall be a 8 gauge soild, Pro-Trace HD-CCS PE45. Tracer Wire shall be copper clad steel conductor with a minimum break load of 2,150 lbs (or 165,800 psi) and shall be extruded with a 45 mil. HDPE coating. The coating shall be of the proper color to meet the APWA color code of the buried utility line. Tracer wire shall meet the specs as that of Pro-Line Safety Products. 8 AWG Soild Pro-Trace HD CCS PE45, Hard Drawn, 21% IACS conductivity, copper clad steel, break load of 2,150 LBS, 45 Mil HDPE coating, 30 Volts and ROHS compliant, Pro-Trace or approved equal.

Tracer wire for open-trench direct bury shall be a 10 gauge solid, Pro-Trace HF-CCS PE30. Tracer wire shall meet the specs as that of Pro-line SafetyProducts. 10 AWG Soild Pro-Trace HF-CCS PE30, consist of a dead soft annealed, 21%IACS conductivity, copper clad steel conductor, break load of 448 LBS (or 55,000 PSI), with a 30 mil HDPE coating, 30 volts and ROHS compliant, the coating shall be of the proper color to meet the APWA color code of the buried utility line, Pro-Trace or approved equal.
